Technical Support

If a problem arises with your system and no solution can be obtained from the user's manual, please contact your place of purchase or local distributor. Alternatively, please try the following help resources for further guidance.

Visit the MSI website for technical guide, BIOS updates, driver updates, and other information:

<http://www.msi.com/service/download>

Contact our technical staff at:

<http://support.msi.com>

Safety Instructions

- Always read the safety instructions carefully.
- Keep this User's Manual for future reference.
- Keep this equipment away from humidity.
- Lay this equipment on a reliable flat surface before setting it up.
- The openings on the enclosure are for air convection hence protects the equipment from overheating. **DO NOT COVER THE OPENINGS.**
- Make sure the voltage of the power source is at 110/220V before connecting the equipment to the power inlet.
- Place the power cord such a way that people can not step on it. Do not place anything over the power cord.
- Always Unplug the Power Cord before inserting any add-on card or module.
- All cautions and warnings on the equipment should be noted.
- Never pour any liquid into the opening that can cause damage or cause electrical shock.
- If any of the following situations arises, get the equipment checked by service personnel:
 - The power cord or plug is damaged.
 - Liquid has penetrated into the equipment.
 - The equipment has been exposed to moisture.
 - The equipment does not work well or you can not get it work according to User's Manual.
 - The equipment has been dropped and damaged.
 - The equipment has obvious sign of breakage.
- **DO NOT LEAVE THIS EQUIPMENT IN AN ENVIRONMENT ABOVE 60°C (140°F), IT MAY DAMAGE THE EQUIPMENT.**

FCC-B Radio Frequency Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the measures listed below.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

Notice 1

The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Notice 2

Shielded interface cables and A.C. power cord, if any, must be used in order to comply with the emission limits.

VOIR LA NOTICE D'INSTALLATION AVANT DE RACCORDER AU RESEAU.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) this device may not cause harmful interference, and
- 2) this device must accept any interference received, including interference that may cause undesired operation.

CE Conformity

Hereby, Micro-Star International CO., LTD declares that this device is in compliance with the essential safety requirements and other relevant provisions set out in the European Directive.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment and its antenna should be installed and operated with minimum distance 20 cm between the radiator and your body. This equipment and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

European Community Compliance Statement

The equipment complies with the RF Exposure Requirement 1999/519/EC, Council Recommendation of 12 July 1999 on the limitation of exposure of the general public to electromagnetic fields (0-300GHz). This wireless device complies with the R&TTE Directive.

Taiwan Wireless Statements

無線設備警告聲明

經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。前項合法通信，指依電信法規定作業之無線電通信。低功率射頻電機須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

警告使用者：這是甲類資訊產品，在居住的環境中使用時，可能會造成無線電干擾，在這種情況下，使用者會被要求採取某些適當的對策。

Japan VCCI Class B Statement

クラス B 情報技術装置

この装置は、情報技術装置等電波障害自主規制協議会（VCCI）の基準に基づくクラスB情報技術装置です。この装置が家庭内でラジオやテレビジョン受信機に近接して使われると、受信障害を引き起こすことがあります。取扱説明書にしたがって正しい取り扱いをしてください。

Korea Warning Statements

당해 무선설비는 운용중 전파혼신 가능성이 있음

Battery Information

European Union:

Batteries, battery packs, and accumulators should not be disposed of as unsorted household waste. Please use the public collection system to return, recycle, or treat them in compliance with the local regulations.

Taiwan:

For better environmental protection, waste batteries should be collected separately for recycling or special disposal.

廢電池請回收

California, USA:

The button cell battery may contain perchlorate material and requires special handling when recycled or disposed of in California.

For further information please visit:

<http://www.dtsc.ca.gov/hazardouswaste/perchlorate/>

CAUTION: There is a risk of explosion, if battery is incorrectly replaced.

Replace only with the same or equivalent type recommended by the manufacturer.

Chemical Substances Information

In compliance with chemical substances regulations, such as the EU REACH Regulation (Regulation EC No. 1907/2006 of the European Parliament and the Council), MSI provides the information of chemical substances in products at:

http://www.msi.com/html/popup/csr/evmtprtt_pcm.html

WEEE (Waste Electrical and Electronic Equipment) Statement

ENGLISH

To protect the global environment and as an environmentalist, MSI must remind you that...

Under the European Union (“EU”) Directive on Waste Electrical and Electronic Equipment, Directive 2002/96/EC, which takes effect on August 13, 2005, products of “electrical and electronic equipment” cannot be discarded as municipal wastes anymore, and manufacturers of covered electronic equipment will be obligated to take back such products at the end of their useful life. MSI will comply with the product take back requirements at the end of life of MSI-branded products that are sold into the EU. You can return these products to local collection points.

DEUTSCH

Hinweis von MSI zur Erhaltung und Schutz unserer Umwelt

Gemäß der Richtlinie 2002/96/EG über Elektro- und Elektronik-Altgeräte dürfen Elektro- und Elektronik-Altgeräte nicht mehr als kommunale Abfälle entsorgt werden. MSI hat europaweit verschiedene Sammel- und Recyclingunternehmen beauftragt, die in die Europäische Union in Verkehr gebrachten Produkte, am Ende seines Lebenszyklus zurückzunehmen. Bitte entsorgen Sie dieses Produkt zum gegebenen Zeitpunkt ausschliesslich an einer lokalen Altgerätesammelstelle in Ihrer Nähe.

FRANÇAIS

En tant qu'écologiste et afin de protéger l'environnement, MSI tient à rappeler ceci...

Au sujet de la directive européenne (EU) relative aux déchets des équipement électriques et électroniques, directive 2002/96/EC, prenant effet le 13 août 2005, que les produits électriques et électroniques ne peuvent être déposés dans les décharges ou tout simplement mis à la poubelle. Les fabricants de ces équipements seront obligés de récupérer certains produits en fin de vie. MSI prendra en compte cette exigence relative au retour des produits en fin de vie au sein de la communauté européenne. Par conséquent vous pouvez retourner localement ces matériels dans les points de collecte.

РУССКИЙ

Компания MSI предпринимает активные действия по защите окружающей среды, поэтому напоминаем вам, что....

В соответствии с директивой Европейского Союза (ЕС) по предотвращению загрязнения окружающей среды использованным электрическим и электронным оборудованием (директива WEEE 2002/96/EC), вступающей в силу 13 августа 2005 года, изделия, относящиеся к электрическому и электронному оборудованию, не могут рассматриваться как бытовой мусор, поэтому производители вышеперечисленного электронного оборудования обязаны принимать его для переработки по окончании срока службы. MSI обязуется соблюдать требования по приему продукции, проданной под маркой MSI на территории ЕС, в переработку по окончании срока службы. Вы можете вернуть эти изделия в специализированные пункты приема.

ESPAÑOL

MSI como empresa comprometida con la protección del medio ambiente, recomienda: Bajo la directiva 2002/96/EC de la Unión Europea en materia de desechos y/o equipos electrónicos, con fecha de rigor desde el 13 de agosto de 2005, los productos clasificados como "eléctricos y equipos electrónicos" no pueden ser depositados en los contenedores habituales de su municipio, los fabricantes de equipos electrónicos, están obligados a hacerse cargo de dichos productos al término de su período de vida. MSI estará comprometido con los términos de recogida de sus productos vendidos en la Unión Europea al final de su período de vida. Usted debe depositar estos productos en el punto limpio establecido por el ayuntamiento de su localidad o entregar a una empresa autorizada para la recogida de estos residuos.

NEDERLANDS

Om het milieu te beschermen, wil MSI u eraan herinneren dat...

De richtlijn van de Europese Unie (EU) met betrekking tot Vervuiling van Electriche en Electronische producten (2002/96/EC), die op 13 Augustus 2005 in zal gaan kunnen niet meer beschouwd worden als vervuiling. Fabrikanten van dit soort producten worden verplicht om producten retour te nemen aan het eind van hun levenscyclus. MSI zal overeenkomstig de richtlijn handelen voor de producten die de merknaam MSI dragen en verkocht zijn in de EU. Deze goederen kunnen geretourneerd worden op lokale inzamelingspunten.

SRPSKI

Da bi zaštitili prirodnu sredinu, i kao preduzeće koje vodi računa o okolini i prirodnoj sredini, MSI mora da vas podesti da...

Po Direktivi Evropske unije ("EU") o odbačenju eelektronskoj i električnoj opremi, Direktiva 2002/96/EC, koja stupa na snagu od 13. Avgusta 2005, proizvodi koji spadaju pod "elektronsku i električnu opremu" ne mogu više biti odbačeni kao običan otpad i proizvođači ove opreme biće prinuđeni da uzmu natrag ove proizvode na kraju njihovog uobičajenog veka trajanja. MSI će poštovati zahtev o preuzimanju ovakvih proizvoda kojima je istekao vek trajanja, koji imaju MSI oznaku i koji su prodati u EU. Ove proizvode možete vratiti na lokalnim mestima za prikupljanje.

POLSKI

Aby chronić nasze środowisko naturalne oraz jako firma dbająca o ekologię, MSI przypomina, że...

Zgodnie z Dyrektywą Unii Europejskiej ("UE") dotyczącą odpadów produktów elektrycznych i elektronicznych (Dyrektywa 2002/96/EC), która wchodzi w życie 13 sierpnia 2005, tzw. "produkty oraz wyposażenie elektryczne i elektroniczne" nie mogą być traktowane jako śmieci komunalne, tak więc producenci tych produktów będą zobowiązani do odbierania ich w momencie gdy produkt jest wycofywany z użycia. MSI wypełni wymagania UE, przyjmując produkty (sprzedawane na terenie Unii Europejskiej) wycofywane z użycia. Produkty MSI będzie można zwracać w wyznaczonych punktach zbiorczych.

TÜRKÇE

Çevreci özelliğiyle bilinen MSI dünyada çevreyi korumak için hatırlatır:

Avrupa Birliği (AB) Kararnamesi Elektrik ve Elektronik Malzeme Atığı, 2002/96/EC Kararnamesi altında 13 Ağustos 2005 tarihinden itibaren geçerli olmak üzere, elektrikli ve elektronik malzemeler diğer atıklar gibi çöpe atılmayacak ve bu elektronik cihazların üreticileri, cihazların kullanım süreleri bittikten sonra ürünleri geri toplamakla yükümlü olacaktır. Avrupa Birliği'ne satılan MSI markalı ürünlerin kullanım süreleri bittiğinde MSI ürünlerin geri alınması isteği ile işbirliği içerisinde olacaktır. Ürünlerinizi yerel toplama noktalarına bırakabilirsiniz.

ČESKY

Záleží nám na ochraně životního prostředí - společnost MSI upozorňuje...

Podle směrnice Evropské unie ("EU") o likvidaci elektrických a elektronických výrobků 2002/96/EC platné od 13. srpna 2005 je zakázáno likvidovat "elektrické a elektronické výrobky" v běžném komunálním odpadu a výrobci elektrických výrobků, na které se tato směrnice vztahuje, budou povinni odebírat takové výrobky zpět po skončení jejich životnosti. Společnost MSI splní požadavky na odebírání výrobků značky MSI, prodávaných v zemích EU, po skončení jejich životnosti. Tyto výrobky můžete odevzdat v místních sběrnách.

MAGYAR

Annak érdekében, hogy környezetünket megvédjük, illetve környezetvédőként fellépve az MSI emlékezteti Önt, hogy ...

Az Európai Unió („EU”) 2005. augusztus 13-án hatályba lépő, az elektromos és elektronikus berendezések hulladékairól szóló 2002/96/EK irányelve szerint az elektromos és elektronikus berendezések többé nem kezelhetőek lakossági hulladékként, és az ilyen elektronikus berendezések gyártói köteleessé válnak az ilyen termékek visszavételére azok hasznos élettartama végén. Az MSI betartja a termékvisszavétellel kapcsolatos követelményeket az MSI márkánév alatt az EU-n belül értékesített termékek esetében, azok élettartamának végén. Az ilyen termékeket a legközelebbi gyűjtőhelyre viheti.

ITALIANO

Per proteggere l'ambiente, MSI, da sempre amica della natura, ti ricorda che....

In base alla Direttiva dell'Unione Europea (EU) sullo Smaltimento dei Materiali Elettrici ed Elettronici, Direttiva 2002/96/EC in vigore dal 13 Agosto 2005, prodotti appartenenti alla categoria dei Materiali Elettrici ed Elettronici non possono più essere eliminati come rifiuti municipali: i produttori di detti materiali saranno obbligati a ritirare ogni prodotto alla fine del suo ciclo di vita. MSI si adegnerà a tale Direttiva ritirando tutti i prodotti marchiati MSI che sono stati venduti all'interno dell'Unione Europea alla fine del loro ciclo di vita. È possibile portare i prodotti nel più vicino punto di raccolta

Chapter 1

Getting Started

Thank you for choosing the **970A-G43** Series (MS-7693 v3.X) ATX mainboard. The **970A-G43** Series mainboards are based on **AMD® 970 & SB950** chipsets for optimal system efficiency. Designed to fit the advanced **AMD® AM3/ AM3+** processors, the **970A-G43** Series deliver a high performance and professional desktop platform solution.

Packing Contents

Optional Accessories

* These pictures are for reference only and may vary without notice.

* The packing contents may vary according to the model you purchased.

* If you need to purchase the optional accessories or request part numbers, please visit the MSI website at <http://www.msi.com/index.php> or consult the dealer.

Assembly Precautions

- The components included in this package are prone to damage from electrostatic discharge (ESD). Please adhere to the following instructions to ensure successful computer assembly.
- Always turn off the power supply and unplug the power cord from the power outlet before installing or removing any computer component.
- Ensure that all components are securely connected. Loose connections may cause the computer to not recognize a component or fail to start.
- Hold the mainboard by the edges to avoid touching sensitive components.
- It is recommended to wear an electrostatic discharge (ESD) wrist strap when handling the mainboard to prevent electrostatic damage. If an ESD wrist strap is not available, discharge yourself of static electricity by touching another metal object before handling the mainboard.
- Store the mainboard in an electrostatic shielding container or on an antistatic pad whenever the mainboard is not installed.
- Before turning on the computer, ensure that there are no loose screws or metal components on the mainboard or anywhere within the computer case.
- Do not use the computer in a high-temperature environment.
- Do not boot the computer before installation is completed. This could cause permanent damage to the components as well as injury to the user.
- If you need help during any installation step, please consult a certified computer technician.

A screwdriver (not included) may be required for computer assembly.

Mainboard Specifications

Processor Support

- Supports AMD® FX™/ Phenom™ II/ Athlon™ II and Sempron™ processors for the AM3/ AM3+ socket

HyperTransport

- HyperTransport™ 3.0, supports up to 4.8 GT/s

Chipset

- AMD® 970 & SB950 chipset

Memory Support

- 4x DDR3 DIMMs support for DDR3-1066/ 1333/ 1600/ 1866/ 2133*(OC) MHz up to 32GB max
- Supports Dual-Channel mode

LAN

- Supports LAN 10/ 100/ 1000 Fast Ethernet by Realtek® 8111E

Audio

- Integrated HD audio codec by Realtek® ALC887
- 8-channel audio with jack sensing
- Compliant with Azalia 1.0 Spec

SATA

- 6x SATA 6Gb/s ports by AMD® SB950

RAID

- SATA1~6 support RAID 0/ 1/ 5/ 10 mode by AMD® SB950

USB 3.0

- 2x USB 3.0 rear I/O ports & 1x USB 3.0 onboard connector by RENESAS UPD720202

Multi-GPU

- Supports AMD® CrossFire™ Technology

Connectors & Buttons

- Back panel
 - 1x PS/2 keyboard port
 - 1x PS/2 mouse port
 - 6x USB 2.0 ports
 - 2x USB 3.0 ports
 - 1x LAN port
 - 6x audio ports
- On-Board
 - 3x USB 2.0 connectors
 - 1x USB 3.0 connector
 - 1x TPM Module connector
 - 1x Front Panel Audio connector
 - 1x Chassis Intrusion connector
 - 1x Serial port connector

Slots

- 2x PCIe 2.0 x16 slots
 - PCI_E2 supports up to PCIe x16 speed
 - PCI_E4 supports up to PCIe x4 speed
- 2x PCIe 2.0 x1 slots
- 2x PCI slots

Form Factor

- ATX (30.5 cm X 22.5 cm)

Mounting Screw Holes

- 6x mounting holes

For the latest information about CPU, please visit
<http://www.msi.com/service/cpu-support>

For more information on compatible components, please visit
<http://www.msi.com/service/test-report>

Connectors Quick Guide

Connectors Reference Guide

Port Name	Port Type	Page
Back Panel	I/O Ports	1-8
CPU1	AM3/ AM3+ CPU Socket	1-11
CPUFAN,SYSFAN1~2	Fan Power Connectors	1-22
DIMM1~4	DDR3 Memory Slots	1-15
JAUD1	Front Panel Audio Connector	1-26
JBAT1	Clear CMOS Jumper	1-28

Back Panel Quick Guide

► Mouse/Keyboard

The standard PS/2® mouse/keyboard DIN connector is for a PS/2® mouse/keyboard.

► USB 2.0 Port

The USB 2.0 port is for attaching USB 2.0 devices such as keyboard, mouse, or other USB 2.0-compatible devices.

► USB 3.0 Port

USB 3.0 port is backward-compatible with USB 2.0 devices. It supports data transfer rate up to 5 Gbit/s (SuperSpeed).

In order to use USB 3.0 devices, you must connect to a USB 3.0 port. If a USB cable is used, it must be USB 3.0 compliant.

► LAN

The standard RJ-45 LAN jack is for connecting to a Local Area Network (LAN).

LED	Color	LED State	Condition
Left	Yellow	Off	LAN link is not established.
		On(Steady)	LAN link is established.
		On(flashing)	The computer is communicating with another computer on the network.
Right	Green	Off	10 Mbits/sec data rate
		On	100 Mbits/sec data rate
	Orange	On	1000 Mbits/sec data rate

► Audio Ports

These connectors are used for audio devices. The color of the jack refers to the function of the connector.

- Blue-Line in: Used for connecting external audio outputting devices.
- Green- Line out: Used as a connector for speakers or headphone.
- Pink- Mic: Used as a connector for a microphone.
- Black- RS-Out: Rear surround sound line out in 4/ 5.1/ 7.1 channel mode.
- Orange- CS-Out: Center/ subwoofer line out in 5.1/ 7.1 channel mode.
- Gray- SS-Out: Side surround sound line out in 7.1 channel mode.

CPU (Central Processing Unit)

Introduction to AM3/ AM3+ CPU

The surface of CPU. Remember to apply some thermal paste on it for better heat dispersion.

Important

Overheating

Overheating can seriously damage the CPU and mainboard. Always make sure the cooling fans work properly to protect the CPU from overheating. Be sure to apply an even layer of thermal paste (or thermal tape) between the CPU and the heatsink to enhance heat dissipation.

Replacing the CPU

When replacing the CPU, always turn off the system's power supply and unplug the power supply's power cord to ensure the safety of the CPU.

Overclocking

This mainboard is designed to support overclocking. Before attempting to overclock, please make sure that all other system components can tolerate overclocking. Any attempt to operate beyond product specifications is not recommend. MSI does not guarantee the damages or risks caused by inadequate operation beyond product specifications.

CPU & Cooler Installation

When you are installing the CPU, **make sure the CPU has a cooler attached on the top to prevent overheating**. Meanwhile, do not forget to apply some thermal paste on CPU before installing the heat sink/cooler fan for better heat dispersion.

Follow the steps below to install the CPU & cooler correctly. Wrong installation will cause the damage of your CPU & mainboard.

1. Pull the lever sideways away from the socket. Make sure to raise the lever up to a 90-degree angle.
2. Look for the gold arrow of the CPU. The gold arrow should point as shown in the picture. The CPU can only fit in the correct orientation.

3. If the CPU is correctly installed, the pins should be completely embedded into the socket and can not be seen. Please note that any violation of the correct installation procedures may cause permanent damages to your mainboard.
4. Press the CPU down firmly into the socket and close the lever. As the CPU is likely to move while the lever is being closed, always close the lever with your fingers pressing tightly on top of the CPU to make sure the CPU is properly and completely embedded into the socket.

5. Position the cooling set onto the retention mechanism.
Hook one end of the clip to hook first.

6. Then press down the other end of the clip to fasten the cooling set on the top of the retention mechanism.
Locate the Fix Lever and lift up it .

7. Fasten down the lever.

8. Attach the CPU Fan cable to the CPU fan connector on the mainboard.

Important

- While disconnecting the Safety Hook from the fixed bolt, it is necessary to keep an eye on your fingers, because once the Safety Hook is disconnected from the fixed bolt, the fixed lever will spring back instantly.
- Confirm that the CPU cooler has formed a tight seal with the CPU before booting your system.
- Please refer to the documentation in the CPU cooler package for more details about CPU cooler installation.

Mounting Screw Holes

When installing the mainboard, first install the necessary mounting stands required for a mainboard on the mounting plate in your computer case. If there is an I/O back plate that came with the computer case, please replace it with the I/O backplate that came with the mainboard package. The I/O backplate should snap easily into the computer case without the need for any screws. Align the mounting plate's mounting stands with the screw holes on the mainboard and secure the mainboard with the screws provided with your computer case. The locations of the screw holes on the mainboard are shown below. For more information, please refer to the manual that came with the computer case.

Important

- Install the mainboard on a flat surface free from unnecessary debris.
- To prevent damage to the mainboard, any contact between the mainboard circuitry and the computer case, except for the mounting stands, is prohibited.
- Please make sure there are no loose metal components on the mainboard or within the computer case that may cause a short circuit of the mainboard.

Power Supply

JPWR1: ATX 24-pin Power Connector

This connector allows you to connect an ATX 24-pin power supply. To connect the ATX 24-pin power supply, align the power supply cable with the connector and firmly press the cable into the connector. If done correctly, the clip on the power cable should be hooked on the mainboard's power connector.

JPWR2: ATX 8-pin Power Connector

This connector provides 12V power to the CPU.

Important

Make sure that all the power cables are securely connected to a proper ATX power supply to ensure stable operation of the mainboard.

Memory

These DIMM slots are used for installing memory modules. For more information on compatible components, please visit <http://www.msi.com/service/test-report>

Dual-Channel mode Population Rule

In Dual-Channel mode, the memory modules can transmit and receive data with two data bus channels simultaneously. Enabling Dual-Channel mode can enhance system performance. The following illustrations explain the population rules for Dual-Channel mode.

Important

- DDR3 memory modules are not interchangeable with DDR2, and the DDR3 standard is not backward compatible. Always install DDR3 memory modules in DDR3 DIMM slots.
- To ensure system stability, memory modules must be of the same type and density.
- Due to chipset resource usage, the system will only detect up to 31+ GB of memory (not full 32 GB) when all DIMM slots have 8GB memory modules installed.

Installing Memory Modules

1. Unlock the DIMM slot by pushing the mounting clips to the side. Vertically insert the memory module into the DIMM slot. The memory module has an off-center notch on the bottom that will only allow it to fit one way into the DIMM slot.
2. Push the memory module deep into the DIMM slot. The plastic clips at each side of the DIMM slot will automatically close when the memory module is properly seated and an audible click should be heard.
3. Manually check if the memory module has been locked in place by the DIMM slot's side clips.

Expansion Slot

This mainboard contains numerous ports for expansion cards, such as discrete graphics or audio cards.

PCIe Slot

The PCIe slot supports the PCIe interface expansion card.

PCI Slot

The PCI slot supports additional LAN, SCSI, USB, and other add-on cards that comply with PCI specifications.

Important

When adding or removing expansion cards, always turn off the power supply and unplug the power supply power cable from the power outlet. Read the expansion card's documentation to check for any necessary additional hardware or software changes.

PCI Interrupt Request Routing

IRQ, or interrupt request lines, are hardware lines over which devices can send interrupt requests to the processor. The PCI IRQ pins are typically connected to the PCI bus pins as followed:

	Order1	Order2	Order3	Order4
PCI1	INT E#	INT F#	INT G#	INT H#
PCI2	INT F#	INT G#	INT H#	INT E#

Video/ Graphics Cards

If available, this mainboard takes advantage of the CPU's integrate graphics processor, but discrete video cards can be installed by way of the mainboard's expansion slots. Adding on one or more discrete video cards will significantly boost the system's graphics performance. For best compatibility, MSI graphics cards are recommended.

Single Video Card Installation

1. Determine what type of expansion slot(s) the video card will use. Locate the expansion slot(s) on the mainboard. Remove any protective expansion slot covers from the computer case.
2. Line up the video card on top of the expansion slot(s) with the display ports facing out of the computer case. For a single video card installation, using the PCI_E2 slot is recommended.
3. Push the video card into its expansion slot(s). Depending on the expansion slot(s) used, there should be clip(s) on the expansion slot(s) that will lock in place.
4. If needed, screw the edge of the graphics card to the computer case. Some video cards might require a power cable directly from the power supply.
5. Please consult your video card's manual for further instructions regarding driver installation or other special settings.

AMD CrossFire™ (Multi-GPU) Technology

AMD CrossFire™ is a multi-GPU performance gaming platform. By linking together two or more discrete GPUs, CrossFire™ can significantly improve system graphics performance. It allows the ability to scale a system's graphics power as needed, making it the most scalable gaming platform. This mainboard will automatically detect CrossFire™ technology and make changes in the BIOS as needed. Follow the instructions below to ensure a successful two-way CrossFire™ installation.

1. Install two AMD Radeon™ HD graphics cards into the PCI_E2 & PCI_E4 expansion slots.
2. With the two cards installed, two CrossFire™ cables are required to connect the graphics cards. Attach one side of the cable on each of the cards by way of the metal contacts (please refer to the picture below). Please note that although two graphics cards have been installed, only the display ports on the graphics card installed in the first PCIe x16 slot will work. All displays should be connected to this graphics card.

Important

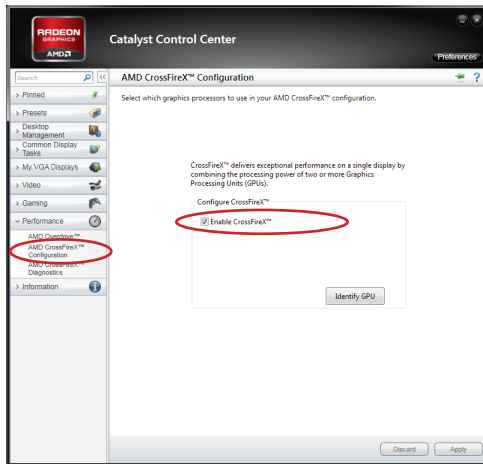

- Please ensure that all graphics cards used in CrossFire™ mode are of the same brand and specifications. For best compatibility with the mainboard, MSI graphics cards are recommended.
- Make sure to connect an adequate power supply to the power connectors on the graphics cards to ensure stable operation.
- Only Windows™ 7 & Windows™ 8 support CrossFire™ mode.

Getting Started

3. Boot up the computer and install the drivers and software included in your video card package. For more information, please refer to the manual that came with your video card.
4. After all of the hardware and software has been properly installed, reboot the system. After entering the operating system (OS), right click on the desktop and choose the "Catalyst Control Center".

5. The CrossFire™ setting must be enabled to allow CrossFire™ mode to operate. The following screen appears in the Catalyst Control Center. Depending on your operating system, the screen may look different.

Important

A CrossFire™ system has four possible display modes:

- SuperTiling
- Scissor Mode
- Alternate Frame Rendering
- Super Anti-aliasing.

For more details, please consult the graphics card manual.

Internal Connectors

SATA1~6: SATA Connector

This connector is a high-speed SATA interface port. Each connector can connect to one SATA device. SATA devices include disk drives (HDD), solid state drives (SSD), and optical drives (CD / DVD / Blu-Ray).

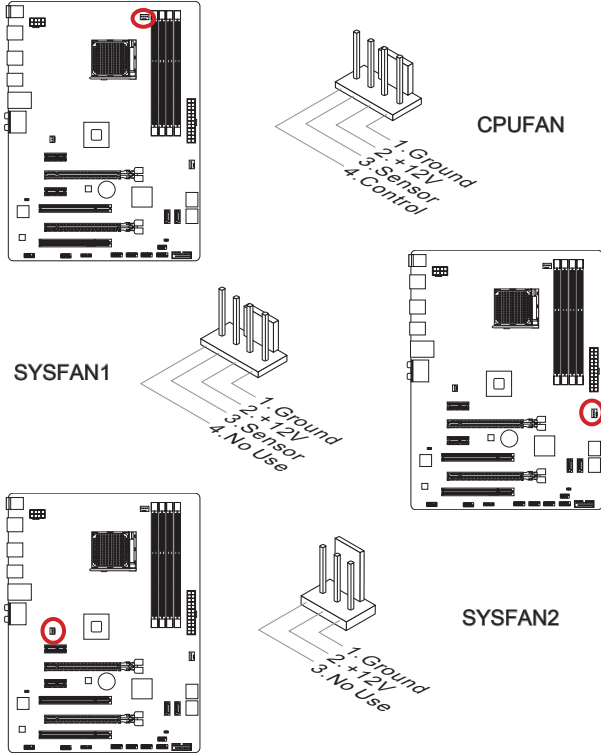

* The MB layout in this figure is for reference only.

Important

- Many SATA devices also need a power cable from the power supply. Such devices include disk drives (HDD), solid state drives (SSD), and optical drives (CD / DVD / Blu-Ray). Please refer to the device's manual for further information.
- Many computer cases also require that large SATA devices, such as HDDs, SSDs, and optical drives, be screwed down into the case. Refer to the manual that came with your computer case or your SATA device for further installation instructions.
- Please do not fold the SATA cable at a 90-degree angle. Data loss may result during transmission otherwise.
- SATA cables have identical plugs on either sides of the cable. However, it is recommended that the flat connector be connected to the mainboard for space saving purposes.

CPUFAN, SYSFAN1~2: Fan Power Connectors

The fan power connectors support system cooling fans with +12V. If the mainboard has a System Hardware Monitor chipset on-board, you must use a specially designed fan with a speed sensor to take advantage of the CPU fan control. Remember to connect all system fans. Some system fans may not connect to the mainboard and will instead connect to the power supply directly. A system fan can be plugged into any available system fan connector.

Important

- Please refer to your processor's official website or consult your vendor to find recommended CPU cooling fans.
- The CPUFAN connector supports Smart Fan Control with linear mode. The Control Center II utility can be installed to automatically control the fan speeds according to the CPU's temperature.
- If there are not enough ports on the mainboard to connect all system fans, adapters are available to connect a fan directly to a power supply.
- Before first boot up, ensure that there are no cables impeding any fan blades.

JFP1, JFP2: Front Panel Connectors

These connectors connect to the front panel switches and LEDs. The JFP1 connector is compliant with the Intel® Front Panel I/O Connectivity Design Guide. When installing the front panel connectors, please use the enclosed mConnectors to simplify installation. Plug all the wires from the computer case into the mConnectors and then plug the mConnectors into the mainboard.

Important

- On the connectors coming from the case, pins marked by small triangles are positive wires. Please use the diagrams above and the writing on the mConnectors to determine correct connector orientation and placement.
- The majority of the computer case's front panel connectors will primarily be plugged into JFP1.

JCI1: Chassis Intrusion Connector

This connector connects to the chassis intrusion switch cable. If the computer case is opened, the chassis intrusion mechanism will be activated. The system will record this intrusion and a warning message will flash on screen. To clear the warning, you must enter the BIOS utility and clear the record.

JUSB1~3: USB 2.0 Expansion Connector

This connector is designed for connecting high-speed USB peripherals such as USB HDDs, digital cameras, MP3 players, printers, modems, and many others.

* The MB layout in this figure is for reference only.

Note that the VCC and GND pins must be connected correctly to avoid possible damage.

JUSB4: USB 3.0 Expansion Connector

The USB 3.0 port is backwards compatible with USB 2.0 devices. It supports data transfer rates up to 5Gbits/s (SuperSpeed).

USB 3.0 Bracket (optional)

Important

- Note that the VCC and GND pins must be connected correctly to avoid possible damage.
- To use a USB 3.0 device, you must connect the device to a USB 3.0 port through an optional USB 3.0 compliant cable.

JAUD1: Front Panel Audio Connector

This connector allows you to connect the front audio panel located on your computer case. This connector is compliant with the Intel® Front Panel I/O Connectivity Design Guide.

JCOM1: Serial Port Connector

This connector is a 16550A high speed communication port that sends/receives 16 bytes FIFOs. You can attach a serial device.

JTPM1: TPM Module Connector

This connector connects to a TPM (Trusted Platform Module). Please refer to the TPM security platform manual for more details and usages.

TPM module (optional)

* The MB layout in this figure is for reference only.

Jumper

JBAT1: Clear CMOS Jumper

There is CMOS RAM onboard that is external powered from a battery located on the mainboard to save system configuration data. With the CMOS RAM, the system can automatically boot into the operating system (OS) every time it is turned on. If you want to clear the system configuration, set the jumpers to clear the CMOS RAM.

Important

You can clear the CMOS RAM by shorting this jumper while the system is off. Afterwards, open the jumper . Do not clear the CMOS RAM while the system is on because it will damage the mainboard.

Drivers and Utilities

After you install the operating system you will need to install drivers to maximize the performance of the new computer you just built. MSI mainboard comes with a Driver Disc. Drivers allow the computer to utilize your mainboard more efficiently and take advantage of any special features we provide.

You can protect your computer from viruses by installing the bundled security program. The bundle also includes a variety of powerful and creative utilities.

Total Installer

Total Installer is very easy to use and does a great job of finding necessary drivers. Please follow the steps below to install drivers and utilities for your new computer.

1. Insert MSI Driver Disc into the optical drive. The setup screen will automatically appear if autorun is enabled in OS.
2. Click Total Installer. A popup dialog will appear listing all necessary drivers.

Click here

3. Select all checkbox on driver listing dialog.
4. Click **Install** button.
5. The software installation will then be in progress, after it has finished it will prompt you to restart.
6. Click **OK** button to finish.
7. Restart your computer.

You can also use the same method to install the utilities.

Chapter 2

BIOS Setup

CLICK BIOS II is a revolutionary UEFI interface that allows you to setup and configure your system for optimum use. Using your mouse and keyboard, users can change BIOS settings, monitor CPU temperature, select the boot device priority and view system information such as the CPU name, DRAM capacity, the OS version and the BIOS version. Users can import and export parameter data for backup or for sharing with friends. By connecting to the Internet within CLICK BIOS II, users can browse webpages, check mail and use Live Update in your system.

Entering

Power on the computer and the system will start the Power On Self Test (POST) process. When the message below appears on the screen, please key to enter CLICK BIOS II:

Press DEL key to enter Setup Menu, F11 to enter Boot Menu

If the message disappears before you respond and you still need to enter CLICK BIOS II, restart the system by turning the computer OFF then back ON or pressing the RESET button. You may also restart the system by simultaneously pressing <Ctrl>, <Alt>, and <Delete> keys.

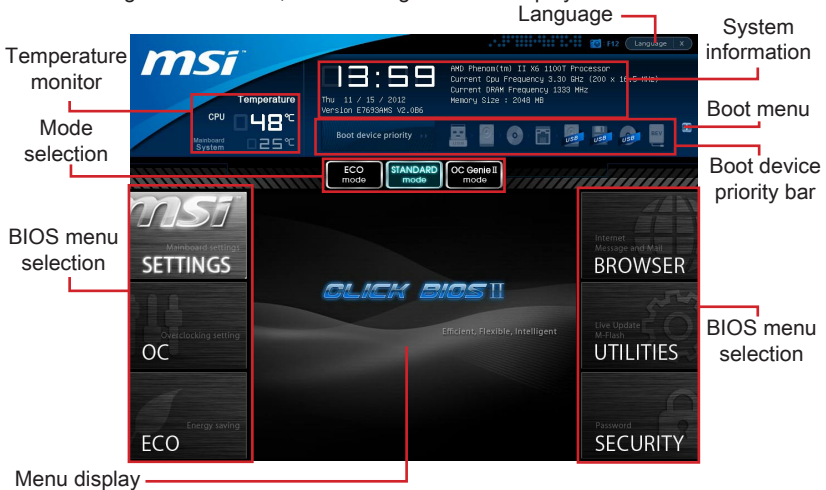

Important

The items under each BIOS category described in this chapter are under continuous update for better system performance. Therefore, the description may be slightly different from the latest BIOS and should be held for reference only.

Overview

After entering CLICK BIOS II, the following screen is displayed.

Important

The pictures in this guide are for reference only and may vary from the product you purchased. Please refer to the actual screens of your system for detailed information.

► Temperature monitor

This block shows the temperatures of the processor and the mainboard.

► System information

This block shows the time, date, CPU name, CPU frequency, DRAM frequency, DRAM capacity and the BIOS version.

► BIOS menu selection

The following options are available:

- **SETTINGS** - Use this menu to specify your settings for chipset features and boot devices.
- **OC** - This menu contains items of the frequency and voltage adjustments. Increasing the frequency can get better performance, however high frequency and heat can cause instability, we do not recommend general users to over-clock.
- **ECO** - This menu is related to energy-saving settings.
- **BROWSER** - This feature is used to enter the MSI Winki web browser.
- **UTILITIES** - This menu contains utilities for backup and update.
- **SECURITY** - The security menu is used to keep unauthorized people from making any changes to the settings. You can use these security features to protect your system.

► Boot device priority bar

You can move the device icons to change the boot priority.

► Boot menu

This button is used to open a boot menu. Click the item to boot the system from the device instantly.

► Mode selection

This feature allows you to load presets of energy saving or overlocking.

► Menu display

This area provides BIOS settings and information to be configured.

► Language

This allows you to select the language of the BIOS setting.

Boot device priority bar

This bar shows the priority of the boot devices. The lighted icons indicate that the devices are available.

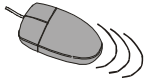

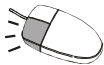

Click and draw the icon to left or right to specify the boot priority.

■ Boot device icon list

Operation

CLICK BIOS II allows you to control BIOS settings with the mouse and the keyboard. The following table lists and describes the hot keys and the mouse operations.

Hot key	Mouse	Description
<↑↓←→>	 Move the cursor	Select Item
<Enter>	 Click/ Double-click the left button	Select Icon/ Field
<Esc>	 Click the right button	Jump to the Exit menu or return to the previous from a submenu
<+>	X	Increase the numeric value or make changes
<->		Decrease the numeric value or make changes
<F1>		General Help
<F4>		CPU Specifications
<F5>		Enter Memory-Z
<F6>		Load optimized defaults
<F8>		OC Profile Load From USB
<F9>		OC Profile Save to USB
<F10>		Save Change and Reset
<F12>		Save a screenshot to a FAT/FAT32 USB drive

Sub-Menu

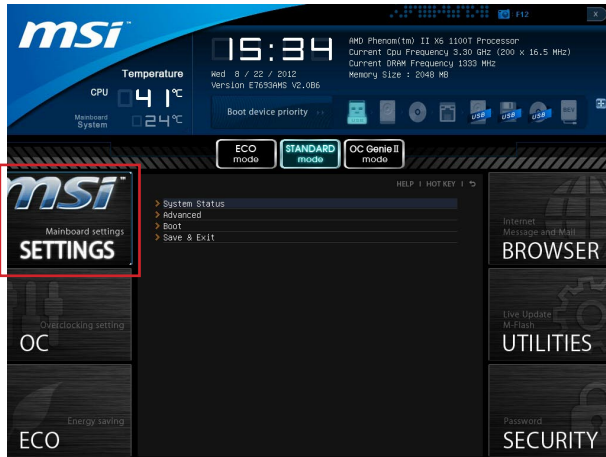

If you find a point symbol to the left of certain fields, that means a sub-menu can be launched for additional options. You can use the arrow keys or mouse to highlight the field and press <Enter> or double-click the left mouse button to enter the sub-menu. If you want to return to the previous menu, just press <Esc> or click the right mouse button.

General Help

The General Help screen lists the appropriate keys to use for navigation. You can call up this screen from any menu by simply pressing <F1>. Press <Esc> to exit the Help screen.

SETTINGS

System Status

► System Date

This allows you to set the system date that you want (usually the current date). The format is <day> <month> <date> <year>.

day	Day of the week, from Sun to Sat, determined by BIOS. Read-only.
month	The month from Jan. through Dec.
date	The date from 1 to 31 can be keyed by numeric function keys.
year	The year can be adjusted by users.

► System Time

This allows you to set the system time that you want (usually the current time). The time format is <hour> <minute> <second>.

► SATA Port1~6

Shows devices connected to specific SATA ports.

Important

If your device is not displayed, turn off computer and re-check SATA cable and power cable connections to the device.

▶ **System Information**

Shows detailed system information, including CPU type, BIOS version, and Memory (read only).

Advanced

▶ **PCI Subsystem Settings**

Press <Enter> to enter the sub-menu.

▶ **PCI Latency Timer**

Controls how long each PCI device can hold the bus before another takes over.

When set to higher values, every PCI device can conduct transactions for a longer time and thus improve the effective PCI bandwidth.

▶ **ACPI Settings**

Press <Enter> to enter the sub-menu.

▶ **ACPI Standby State**

This item specifies the power saving modes for ACPI function.

▶ **Power LED**

Configures how the system uses power LEDs on the case to indicate sleep/ suspend state.

[Dual] The power LED changes its color to indicate the sleep/suspend state.

[Blinking] The power LED blinks to indicate the sleep/suspend state.

▶ **Integrated Peripherals**

Press <Enter> to enter the sub-menu.

▶ **Onboard LAN Controller**

This item allows you to enable/ disable the onboard LAN controller.

▶ **LAN Option ROM**

This item is used to decide whether to invoke the Boot ROM of the onboard LAN.

▶ **SATA Mode**

This item is used to specify RAID/ IDE/ AHCI mode for SATA port.

Important

You cannot switch between AHCI and IDE if you already have your operating system installed. If you have installed your OS using AHCI and you clear your BIOS/reset to default settings, you will need to change this function back to AHCI to ensure proper functionality.

▶ HD Audio Controller

This item allows you to enable/ disable the HD audio controller.

▶ HPET

The HPET (High Precision Event Timers) is a component that is part of the chipset. You can enable it, and will provide you with the means to get to it via the various ACPI methods.

▶ USB Configuration

Press <Enter> to enter the sub-menu.

▶ USB Controller

This item allows you to enable/ disable the integrated USB 2.0 controller.

▶ Legacy USB Support

Enable or disable support for USB keyboards, mice and floppy drives. You will be able to use these devices with operating systems that do not support USB.

▶ Onboard USB 3.0 Controller

This item allows you to enable/ disable the USB 3.0 controller.

▶ Super IO Configuration

Press <Enter> to enter the sub-menu.

▶ Serial Port 0 Configuration

Press <Enter> to enter the sub-menu.

▶ Serial Port0

This item allows you to enable/ disable the serial port.

▶ Serial Port0 Settings

Select an address and corresponding interrupt for the serial port.

▶ Hardware Monitor

Press <Enter> to enter the sub-menu.

▶ CPU Smart Fan Target

Controls CPU fan speed automatically depending on the current temperature and to keep it with a specific range. If the current CPU temperature reaches the target value, the smart fan function will be activated.

▶ SYS Fan1 Control

This item allows users to select how percentage of speed for the SYSFAN1.

▶ Power Management Setup

Press <Enter> to enter the sub-menu.

▶ EuP 2013

Energy Using Products Lot 6 2013 (EUP) reduces power consumption when system is off or in standby mode.

Note: When enabled, the system will not support RTC wake up event functions.

▶ Restore after AC Power Loss

This item specifies whether your system will reboot after a power failure or interrupt occurs. Settings are:

[Power Off] Always leaves the computer in the power off state.

[Power On] Always leaves the computer in the power on state.

[Last State] Restore the system to the status before power failure or interrupt occurred.

▶ Windows 8 Configuration

Press <Enter> to enter the sub-menu.

▶ Windows 8 Feature

When enabled, the system will switch to the UEFI mode to meet the Windows 8 logo requirement. Before enabling this field, please make sure all installed devices & utilities (hardware & software) meet the Windows 8 system requirements.

▶ MSI Fast Boot

This setting enables or disables the MSI Fast Boot function.

▶ Fast Boot

When enabled, some items will be activated and users can use these items to set the Windows 8 fast boot events. "Fast Boot" will only be available When "MSI Fast Boot" is disabled.

▶ Wake Up Event Setup

Press <Enter> to enter the sub-menu.

▶ Wake Up Event By

Setting to [BIOS] activates the following fields, and use the following fields to set the wake up events. Setting to [OS], the wake up events will be defined by OS.

▶ Resume By RTC Alarm

The field is used to enable or disable the feature of booting up the system on a scheduled time/date.

▶ **Date/ HH:MM:SS**

If Resume By RTC Alarm is set to [Enabled], the system will automatically resume (boot up) on a specific date/hour/minute/second specified in these fields (using the <+> and <-> to select the date & time settings).

▶ **Resume By PCI or PCI-E Device**

When set to [Enabled], the feature allows your system to be awakened from the power saving modes through any event on PCI/ PCIe device.

▶ **Resume From S3 by USB Device**

The item allows the activity of the USB device to wake up the system from S3 (Suspend to RAM) sleep state.

▶ **Resume From S3/S4/S5 by PS/2 Mouse/ Keyboard**

These items determine whether the system will be awakened from what power saving modes when input signal of the PS/2 mouse/ keyboard is detected.

Boot

▶ **Full Screen Logo Display**

[Enabled] The OS boots straight to the GUI without showing the POST screen,

[Disabled] Shows the POST messages at boot.

== Boot Option Priorities==

▶ **1st~9th Boot**

These items are used to prioritize the installed boot devices.

▶ **USB KEY Drive BBS Priorities/ UEFI Boot Drive BBS Priorities**

▶ **1st~8th Boot**

These items are used to prioritize the installed USB key drives/ hard disk drives/ UEFI boot drives.

Save & Exit

▶ **Discard Changes and Exit**

This item is used to abandon all changes and exit setup.

▶ **Save Changes and Reboot**

This item is used to save changes and reboot the system.

▶ **Save Changes**

This item is used to save changes.

▶ **Discard Changes**

This item is used to abandon all changes.

▶ **Restore Defaults**

This item is used to load the optimized default values set by the BIOS vendor.

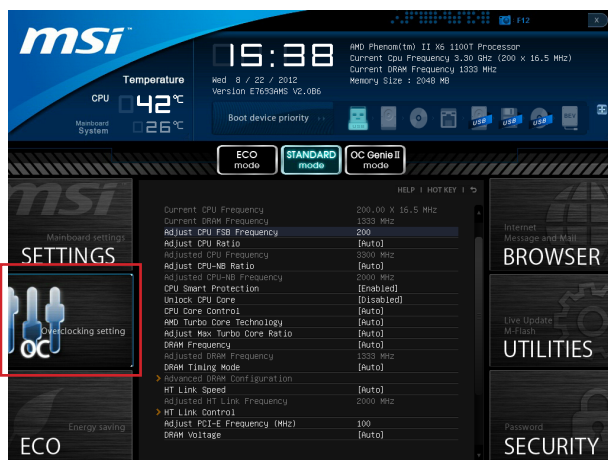

== Boot Override ==

The installed storage devices will appear on this menu, you can select one of them be a boot device.

▶ **Built-in EFI Shell**

Use this item to enter the EFI Shell.

OC

Important

- *Overclocking your PC manually is only recommended for advanced users.*
- *Overclocking is not guaranteed, and if done improperly, can void your warranty or severely damage your hardware.*
- *If you are unfamiliar with overclocking, we advise you to use OC Genie for easy overclocking.*

▶ Current CPU/ DRAM Frequency

These items show the current clocks of CPU and Memory speed. Read-only.

▶ Adjust CPU FSB Frequency

Allows you to set the CPU FSB frequency (in MHz). You may overclock the CPU by adjusting this value. Please note that overclocking behavior and stability is not guaranteed.

▶ Adjust CPU Ratio

Controls the multiplier that is used to determine internal clock speed of the processor. This feature can only be changed if the processor supports this function.

▶ Adjusted CPU Frequency

It shows the adjusted CPU frequency. Read-only.

▶ Adjust CPU-NB Ratio

This item is used to adjust CPU-NB ratio.

▶ **Adjusted CPU-NB Frequency**

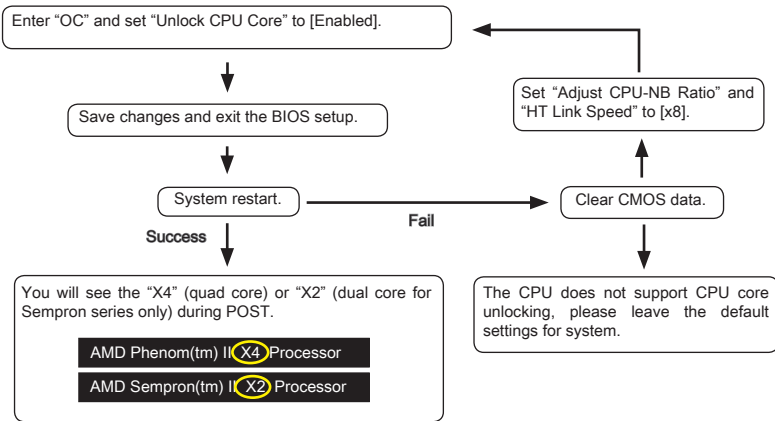

It shows the adjusted CPU-NB frequency. Read-only.

▶ **CPU Smart Protection**

CPU Smart Protection is a mechanism of CPU overheating protection. It will automatically reduce the clock when the CPU temperature gets too high.

▶ **Unlock CPU Core**

This item is used to unlock the CPU core. Please refer to the procedures below for CPU core unlocked in BIOS setup.

 **Important**

- This CPU core unlocked behavior depends on the CPU ability/ characteristic, and it is not guaranteed.
- Depend on CPU's characteristic, once you get instable scenario, please restore the default settings for system.
- You can also check the core numbers in performance tab of Windows task manager.

▶ **CPU Core Control**

This item allows you to select the number of active processor cores. When set to [Auto], the CPU will operate under the default number of cores.

▶ **AMD Turbo Core Technology**

This technology automatically increases the frequency of active CPU cores to improve performance.

▶ **Adjust Max Turbo Core Ratio**

This item allows you to adjust the max turbo core ratio.

▶ DRAM Frequency

This item allows you to adjust the DRAM frequency.

▶ Adjusted DRAM Frequency

It shows the adjusted DRAM frequency. Read-only.

▶ DRAM Timing Mode

Select whether DRAM timing is controlled by the SPD (Serial Presence Detect) EEPROM on the DRAM module. Setting to [Auto] enables DRAM timings and the following “Advanced DRAM Configuration” sub-menu to be determined by BIOS based on the configurations on the SPD. Selecting [Link] or [Unlink] allows users to configure the DRAM timings for each channel and the following related “Advanced DRAM Configuration” sub-menu manually.

▶ Advanced DRAM Configuration

Press <Enter> to enter the sub-menu.

▶ Command Rate

This setting controls the DRAM command rate.

▶ tCL

Controls CAS latency which determines the timing delay (in clock cycles) of starting a read command after receiving data.

▶ tRCD

Determines the timing of the transition from RAS (row address strobe) to CAS (column address strobe). The less clock cycles, the faster the DRAM performance.

▶ tRP

Controls number of cycles for RAS (row address strobe) to be allowed to pre-charge. If insufficient time is allowed for RAS to accumulate before DRAM refresh, the DRAM may fail to retain data. This item applies only when synchronous DRAM is installed in the system.

▶ tRAS

Determines the time RAS (row address strobe) takes to read from and write to memory cell.

▶ tRFC

This setting determines the time RFC takes to read from and write to a memory cell.

▶ tWR

Determines minimum time interval between end of write data burst and the start of a pre-charge command. Allows sense amplifiers to restore data to cell.

▶ tWTR

Determines minimum time interval between the end of write data burst and the start of a column-read command; allows I/O gating to overdrive sense amplifiers before read command starts.

▶ **tRRD**

Specifies the active-to-active delay of different banks.

▶ **tRTP**

Time interval between a read and a precharge command.

▶ **tFAW**

This item is used to set the tFAW (four activate window delay) timing.

▶ **tWCL**

This item is used to set the tWCL (Write CAS Latency) timing.

▶ **tCKE**

This item is used to set the Pulse Width for DRAM module.

▶ **tRTL**

This item is used to set Round Trip Latency settings.

▶ **tXP**

Exit Power Down with DLL on to and valid command; Exit Precharge Power Down with DLL frzon to commands not requiring a locked DLL.

==Advanced Timing Configuration==

Following items are used to set the read/ write timings for memory.

▶ **tRRDR**

Read-Read Different Rank, same DIMM.

▶ **tRRDD**

Read-Read Different Rank.

▶ **tWWDR**

Write-Write Different Rank, same DIMM.

▶ **tWWDD**

Write-Write Different Rank.

▶ **tRWDRDD**

Read-Write Different Ranks same or Different DIMM.

▶ **tWRDRDD**

Write-Read Different Ranks same or Different DIMM.

▶ **tRWSR**

Read-Write Same Rank.

▶ **HT Link Speed**

This item allows you to set the Hyper-Transport Link speed. Setting to [Auto], the system will detect the HT link speed automatically.

▶ **Adjusted HT Link Frequency**

It shows the adjusted HT Link frequency. Read-only.

▶ HT Link Control

Press <Enter> to enter the sub-menu.

▶ HT Incoming/ Outgoing Link Width

These items allow you to set the Hyper-Transport Link width. Setting to [Auto], the system will detect the HT link width automatically.

▶ DRAM Voltage/ SB Voltage/ NB Voltage/ CPU Voltage/ CPU-NB Voltage

These items are used to adjust the voltage of CPU, Memory and chipset.

▶ Spread Spectrum

This function reduces the EMI (Electromagnetic Interference) generated by modulating clock generator pulses.

Important

- *If you do not have any EMI problem, leave the setting at [Disabled] for optimal system stability and performance. But if you are plagued by EMI, select the value of Spread Spectrum for EMI reduction.*
- *The greater the Spread Spectrum value is, the greater the EMI is reduced, and the system will become less stable. For the most suitable Spread Spectrum value, please consult your local EMI regulation.*
- *Remember to disable Spread Spectrum if you are overclocking because even a slight jitter can introduce a temporary boost in clock speed which may just cause your overclocked processor to lock up.*

▶ Overclocking Profiles

Press <Enter> to enter the sub-menu.

▶ Overclocking Profile 1/ 2/ 3/ 4/ 5/ 6

Press <Enter> to enter the sub-menu.

▶ Set Name for Overclocking Profile 1/ 2/ 3/ 4/ 5/ 6

Give a name by typing in this item.

▶ Save Overclocking Profile 1/ 2/ 3/ 4/ 5/ 6

Save the current overclocking settings to ROM for selected profile.

▶ Load/ Clear Overclocking Profile 1/ 2/ 3/ 4/ 5/ 6

Load/ Clear the stored profile settings from ROM.

▶ Overclocking Profile Save

Save the current overclocking settings to USB flash disk.

▶ Overclocking Profile Load

Load the stored settings from USB flash disk.

▶ MEMORY-Z

Press <Enter> to enter the sub-menu. This sub-menu highlights all the settings and timings of your DIMMs. This information will vary by model and is read-only. You can also access this information at any time by pressing [F5]. Press <Enter> to enter the sub-menu.

▶ DIMM1~4 Memory SPD

Press <Enter> to enter the sub-menu. The sub-menu displays the informations of installed memory.

▶ CPU Specifications

Press <Enter> to enter the sub-menu. This sub-menu highlights all the key features of your CPU. The information will vary by model and is read-only. You can also access this information at any time by pressing [F4]. Press <Enter> to enter the sub-menu.

▶ CPU Technology Support

Press <Enter> to enter the sub-menu. The sub-menu shows the installed CPU technologies. Read only.

▶ CPU Features

Press <Enter> to enter the sub-menu.

▶ AMD Cool'n'Quiet

The Cool'n'Quiet technology can effectively and dynamically lower CPU speed and power consumption.

Important

To ensure that Cool'n'Quiet function is activated and will be working properly, it is required to double confirm that:

- Run BIOS Setup, and select OC. Under OC Menu, find CPU Features > AMD Cool'n'Quiet, and set this item to "Enabled".
- Enter Windows, and select [Start]->[Settings]->[Control Panel]->[Power Options]. Enter Power Options Properties tag, and select Minimal Power Management under Power schemes.

▶ C1E Support

Enable this item to reduce the CPU power consumption while idle. Not all processors support Enhanced Halt state (C1E).

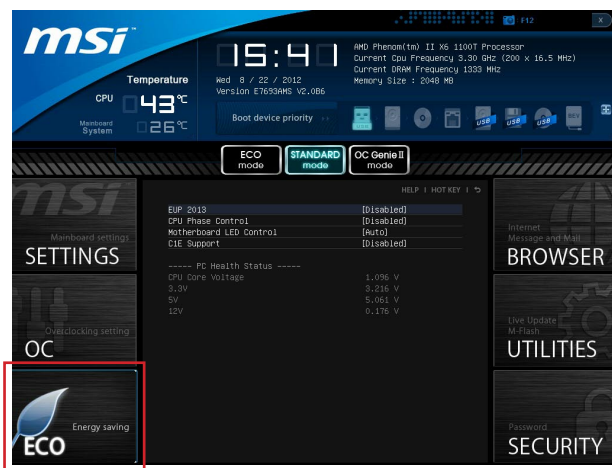

▶ SVM Mode

This item allows you to enable/disable the AMD SVM (Secure Virtual Machine) Mode.

▶ IOMMU Mode

This item allows you to enable/disable the IOMMU (I/O Memory Management Unit) for I/O virtualization.

ECO

Important

Once you click the "ECO" button in the pre-set area, some items in ECO menu will be fixed and un-adjustable.

► EUP 2013

Energy Using Products Lot 6 2013 (EUP) reduces power consumption when system is off or in standby mode.

Note: When enabled, the system will not support RTC wake up event functions.

► CPU Phase Control

This item allows you to enable (Auto)/ disable (disabled) the CPU power phase switch feature to reach the best power saving.

► Motherboard LED Control

This item allows you to enable (Auto)/ disable (disabled) the mainboard phase LED.

► C1E Support

To enable this item to reduce the CPU power consumption while idle. Not all processors support Enhanced Halt state (C1E).

► CPU Core Voltage/ 3.3V/ 5V/ 12V

These items show the voltages. Read only.

BROWSER

Please install the MSI "Winki" application first in the Windows operating system with the MSI Driver Disc before using the browser. Then you can click the BROWSER to access the Internet, e-mail and instant messaging.

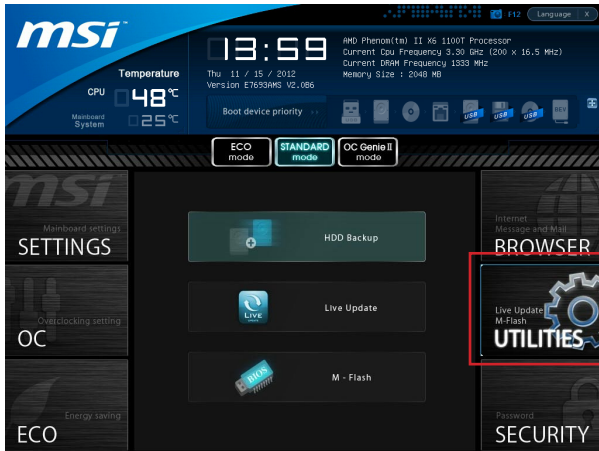

Installing Winki

To install Winki, follow the steps below:

1. Power on your computer and enter Windows operating system.
2. Insert MSI Driver Disc into the optical drive. The setup screen will automatically appear.
3. Click Driver tab.
4. Click OTHERS button.
5. Select Winki to start installing.
6. When finished, restart your computer.

UTILITIES

► HDD Backup

Hard disk storage backups and restoring is one of the most common and important tasks. Use this utility to create an image of your HDD partitions and re-load them when necessary.

Important

The HDD Backup can't back up (/restore) image to (/from) a partition where itself was installed, so it's strongly recommended to divide HDD into 2 partitions at least (1st for OS; 2nd for data).

For HDD with single partition only, the requirements for HDD Backup are:

1. An additional partition from another HDD (ex. USB HDD) for HDD Backup to back up (/restore) image to (/from) it.
2. Executing Winki stored in USB flash drive/ MSI Driver Disc by pressing <F11> to choose boot device during POST.

► Live Update

This tool can detect and update your BIOS online so that you won't need to spend time searching manually.

Important

HDD Backup and Live Update request Winki, please install the "Winki" software application from MSI Driver Disc in Windows first. And then you can access these two utilities by clicking their respective buttons.

► M-Flash

► BIOS Boot Function

This allows you to enable/ disable the system to boot from the BIOS file inside USB drive (FAT/ 32 format only).

► Select one file to boot

When the BIOS Boot function as sets to [Enabled], this item is selectable. This item allows to select particular BIOS file from the USB/ Storage (FAT/ 32 format only) drive. And the system will boot from selected BIOS file.

► Save BIOS to storage

Please setup a specific folder in specific USB/ Storage drive to save BIOS file from BIOS ROM chip data. Note: it only supports FAT/ 32 file system drive.

► Select one file to update BIOS

This item allows you to select a particular BIOS file from the USB/ Storage (FAT/ 32 format only) drive for updating BIOS.

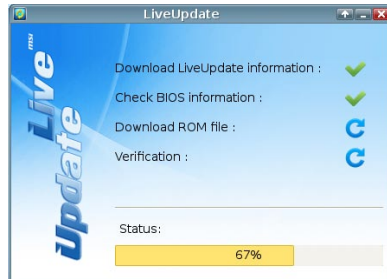

Updating the BIOS with Live Update

This section tells you how to update the BIOS by using the Live Update utility before entering Operating System. Live Update will update the BIOS automatically when connecting to the Internet. To update the BIOS with the Live Update utility:

1. Click Live Update button  on the BIOS UTILITIES menu. (The Winki must be installed).

2. Setup the connection by click the setting button  if necessary.
3. Click the next button .
4. Live Update will automatically detect the version of BIOS and download the appropriate file.

5. Click the confirm button  to update the BIOS.

Important

Do not unplug or shut off your system during BIOS Flash. Incorrect BIOS flashing can cause the motherboard to not POST. Please ensure you have the correct version and model of your motherboard BIOS when updating.

SECURITY

► **Administrator Password**

Set the administrative password that will be required to enter the BIOS.

► **User Password**

Set the user password that will be required to enter the operating system.

 **Important**

When selecting the Administrative / User Password items, a password box will appear on the screen. Type the password then press <Enter>. The password typed now will replace any previous set password from CMOS memory. You will be prompted to confirm the password. You may also press <Esc> to abort the selection.

To clear a set password, press <Enter> when you are prompted to enter a new password. A message will confirm the password is being disabled. Once the password is disabled, you can enter the setup and OS without authorization.

► **U-Key**

Enable or disable USB driver device as key. This requires the USB device to be plugged in for access to the computer..

► **Make U-Key at**

When the “U-Key” as sets to [Enabled], this item is selectable. This item allows you to specify the USB drive.

► **Chassis Intrusion Configuration**

Press <Enter> to enter the sub-menu.

► **Chassis Intrusion**

Enables or disables the feature of recording the chassis intrusion status and issuing a warning message if opened. To clear the warning logs, set the field to [Reset]. The setting of the field will return to [Enabled] later.

Appendix A

Realtek Audio

The Realtek audio provides 8-channel DAC. To achieve the 8-channel sound effect, the 7th and 8th channels must be plugged into the output on the front panel. The section will tell you how to install driver and use the software.

Software Configuration

After installing the audio driver, the “Realtek HD Audio Manager” icon will appear at the notification area (lower right of the screen). You may double click the icon and the GUI will pop up accordingly.

It is also available to enable the audio driver by clicking the Realtek HD Audio Manager from the Control Panel.

Software panel overview

The following figure describes the function of the Realtek HD Audio Manager panel.

■ Device Selection

Here you can select an audio output source to change the related options. The “check” sign (in orange) indicates the device as default.

■ Volume Adjustment

You can control the volume or balance the right/left side of the speakers that you plugged in front or rear panel by adjusting the bar.

■ Application Enhancement

The array of options will provide you a complete guidance of anticipated sound effect for both output and input device.

■ Jack status panel

This panel depicts all render and capture devices currently connected with your computer.

Auto popup dialog

When the device is plugged into the jack, a dialogue window will pop up asking you which device is currently connected.

As you know, each jack corresponds to its default setting, you can refer to the next section “Hardware Default Setting”.

Hardware Default Setting

The following diagrams are audio back panel default setting.

- Backpanel audio jacks to 2-channel speakers diagram

- Backpanel audio jacks to 4-channel speakers diagram

- Backpanel audio jacks to 6-channel speakers diagram

- Backpanel audio jacks to 8-channel speakers diagram

Appendix B

AMD RAID

The integrate one SATA host controller separately, and support RAID function for performance and reliability.

The SATA RAID provides support for RAID 0 (Striping), RAID 1 (Mirroring), RAID 10 (Striping & Mirroring) & RAID 5 (striping with parity) (optional). RAID 0 greatly improves hard disk I/O performance by concurrently striping data across multiple drives. RAID 1 makes sure data is not lost if a drive fails as data is simultaneously written to two drives. Drives configured for RAID Striping are said to form a RAID 0 set, while drives configured for RAID Mirroring are said to form a RAID 1 set. RAID 10 is implemented as a mirrored array whose segments are RAID 0 arrays. RAID 10 has same fault tolerance as mirroring and reduces overhead by striping. It needs at least four drives to form a RAID 10. RAID 5 defines techniques for parity data.

RAID Configuration

Creating and deleting RAID set and performing other RAID setting up operations are done in the RAID BIOS. During boot-up, a screen similar to the one below will appear for about few seconds. Press <Ctrl-F> to enter RAID Option ROM utility.

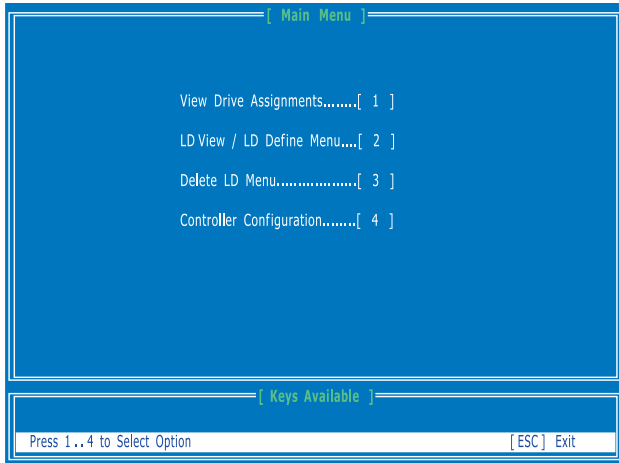

Press <Ctrl-F> to enter RAID Option ROM utility...

Important

Be sure to enable the RAID function for SATA device in BIOS before configuring the RAID Option ROM Utility.

The RAID Option ROM utility menu screen will appear. The Main Menu is used to choose the operation to be performed.

View Drives Assignments

This window displays the model number, capacities and assignment of the drives physically attached to the SATA host adapter.

[View Drives Assignments]				
Port : ID	Drive Model	Capabilities	Capacity (GB)	Assignment
01 : 00	ST32000641AS	SATA 6G	2000.39	<Single Disk>
	Extent 1		2000.39	<Single Disk>
02 : 00	ST32000641AS	SATA 6G	2000.39	<Single Disk>
	Extent 1		2000.39	<Single Disk>

[Keys Available]				
[↑] Up	[↓] Down	[PaUp / PaDn] Switch Page	[Ctrl + H] Full Erase	
[ESC] Exit				

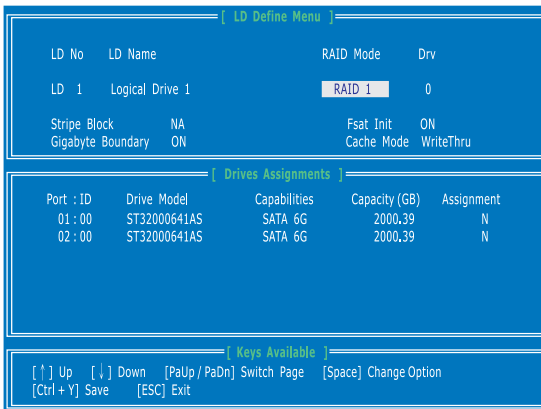

LD View / LD Define Menu (Creating RAID)

The selection of the RAID configuration should be based upon factors including performance, data security, and the number of drives available. It is best to carefully consider the long-term role of the system and plan the data storage strategy. RAID sets can be created either automatically, or to allow the greatest flexibility, manually.

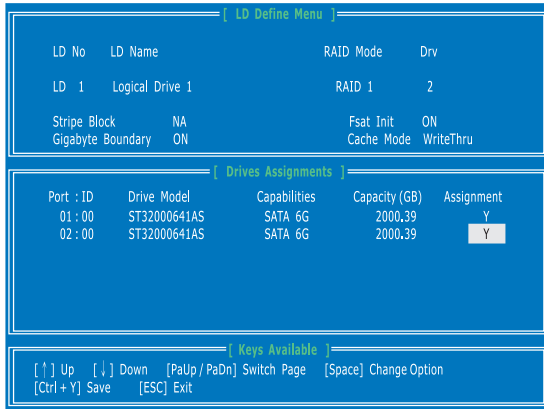

1. Press 2 on the Main Menu screen to enter the LD View Menu.

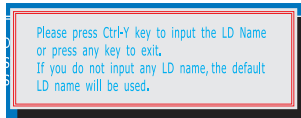

2. And then press [Ctrl + C] keys to enter the LD Define Menu. Use the space key to choose a RAID mode (RAID 0/ 1/ 10/ 5) and use the arrow key to move to the "Drives Assignments" window.

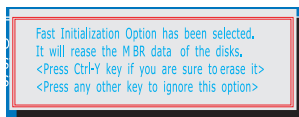

- Stripe Block Size, the default 64KB is best for most applications. RAID 0 or 10 only.
 - Gigabyte Boundary, allows use of slightly smaller replacement drives.
3. On the Drives Assignments window, use the arrow key to choose the hard drives which you want to make part of the LD, use the space key to change the assignment to "Y". Then press [Ctrl+Y] to save the configuration.

4. A message will show, press [Ctrl + Y] to input a LD name as your desire or press any key to save default LD name.

5. Another message will show, press [Ctrl-Y] if you are sure to erase the MBR data of the disk. Or press any key to ignore this option.

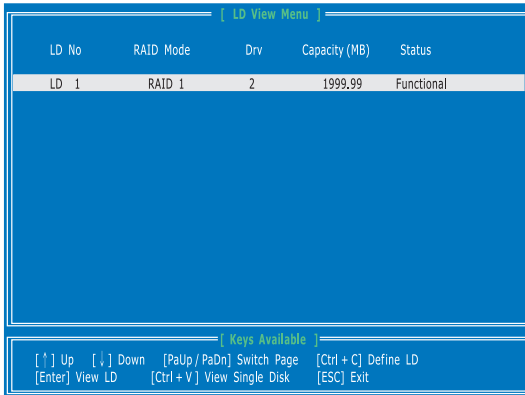

- 6. The message will show up on the bottom, press any key to use maximum capacity or press [Ctrl-Y] to modify array capacity manually.

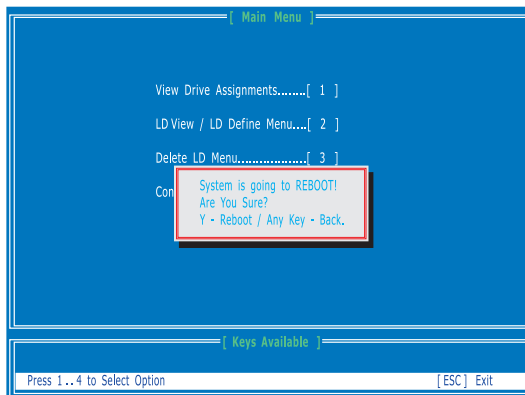

Important

- The default capacity is the full capacity of the selected hard drives.
 - If you allocate the first LD capacity manually, you can create second LD with remaining capacity of the selected hard drives.
- 7. The LD creation is done, the screen shows the LD information as below. Press ESC key to the main screen.

- 8. Press ESC key to exit the utility, a message “System is going to REBOOT! Are You Sure?” will display, answer “Y” to exit it and the system will reboot.

Delete LD Menu (Deleting RAID)

1. Press "3" on the main to enter the Delete LD Menu.
2. Choose a LD No. you want to delete and press [Del] or [Alt+D] delete the RAID set.

[Delete LD Menu]					
LD No	RAID Mode	Drv	Capacity (MB)	Status	
LD 1	RAID 1	2	1999.99	Functional	

[Keys Available]					
[↑] Up	[↓] Down	[PaUp / PaDn]	Switch Page	[Del / Alt+D]	Delete LD

3. On the next screen, a message will display to inform you, press "Ctrl+Y" to delete the RAID set or other key to abort it. Press "Ctrl+Y" to complete the deletion.

[View LD Definition Menu]					
LD No	LD Name	RAID Mode	Drv	Capacity (GB)	
LD 1	Logical Drive 1	RAID 1	0	1999.99	
Stripe Block	NA	Cache Mode	WriteThru		

[Drives Assignments]					
Port : ID	Drive Model	Capabilities	Capacity (GB)	Assignment	
01 : 00	ST32000641AS	SATA 6G	2000.39	N	
02 : 00	ST32000641AS	SATA 6G	2000.39	N	

Press Ctrl-Y to delete the data in the disk! Or press any other key to abort...

Installing Driver

■ New Windows 7/ Windows XP Installation

The following details the RAID driver installation while installing operating system.

1. When you start installing Windows XP, you may encounter a message stating, "Setup could not determine the type of one or more mass storage devices installed in your system". If this is the case, then you are already in the right place and are ready to supply the driver. If this is not the case, then press F6 when prompted at the beginning of Windows setup..
2. Press the "S" key to select "Specify Additional Device".
3. You should be prompted to insert a floppy disk containing the AMD® RAID driver into the A: drive.

Note: For Windows XP, you can use the USB floppy drive only.

For Windows 7 you can use CD/ DVD/ USB drive.

Important

Please follow the instruction below to make a "RAID Driver" for yourself.

- Insert the MSI Driver Disc into optical drive.
 - Click the "Browse CD" on the Setup screen.
 - Copy all the contents in the : \\ChipSet\AMD\Package\Drivers\SBDrv\SB9xx\RAID (and then, please select a folder which was classified according to OS.)
 - The driver diskette for RAID Controller is done.
4. For Windows 7: During the Operating system installation, after selecting the location to install Windows 7 click on "Load Driver" button to install a third party SCSI or RAID driver.
 5. When prompted, insert the floppy disk or media (CD/DVD or USB) you created in step 3 and press Enter.
 6. You should be shown a list of available SCSI Adapters.
 7. Select the appropriate RAID controller and press ENTER.
 8. The next screen should confirm that you have selected the RAID controller. Press ENTER again to continue.
 9. You have successfully installed the RAID driver, and Windows setup should continue.
 10. Leave the disk in the medium until the system reboots itself. Windows setup will need to copy the files from the medium again after the RAID volume is formatted, and Windows setup starts copying files.

■ Existing Windows Driver Installation

1. Insert the MSI DVD into the DVD-ROM drive.
2. The DVD will auto-run and the setup screen will appear.
3. Under the Driver tab, click on AMD chipset drivers by your need. The AMD chipset drivers includes RAID Driver.
4. The driver will be automatically installed.

■ Confirming Windows Driver Installation

1. From Windows, open the Control Panel from My Computer followed by the System icon.
2. Choose the Hardware tab, then click the Device Manager tab.
3. Click the "+" in front of the SCSI and RAID Controllers hardware type. The driver AMD RAID Controller should appear.
