

TF8200 A2+ Motherboard

- AMD AM2+/AM2 Platform
- Support latest AMD Phenom Athlon/ Sempron processors
- Dual-Channel DDR2 -1066/800/667/533
- Support nVidia Hybrid SLI Technology
- Integrated Geforce 8200-based graphics (DX10)
- Integrated HDMI/DVI interface with HDCP
- Biostar Space-Pipe (Heat-Pipe) Thermal solution
- Optional Biostar Cooler Harbor to consist Hybrid Space-Pipe
- Optional Biostar M.D.V (Multi-Digital-View) device

TF8200 A2+ OVERVIEW

CPU-Chipset

AM2¹

AM3/AM2+ Support

Supporting upcoming AMD Socket AM3/AM2+ 45nm processors, it delivers better overclocking capabilities and reduces power consumption. Moreover, AM3 CPU supports both DDR2 /DDR3 memory module and accelerates data transfer rate by up to 5200MT/s via HyperTransport 3.0 technology.

Socket AM2+ Phenom processors Support

Supporting AMD® Socket AM2+ Quad /Triple Core processors, it delivers better overclocking capabilities with low power consumption. Phenom processor features dual-channel DDR2 1066 memory support and accelerates data transfer rate by up to 5200MT/s via HyperTransport[™] 3.0 system bus.

HyperTransport 3.0 Support

It provides a maximum 5200MT/s via HyperTransport[™] 3.0 system bus and significantly improves system efficiency for a high performance and faster desktop.

Multi-Digital-View

M.D.V (Multi-Digital-View) {INS_STR}

Engineered by Biostar, the M.D.V (Multi-Digital -View) technology supports up to two digital monitors at a time. Adding multi-display support to a system (in independent mode) can be an easy and effective way to increase productivity. With the growing popularity of digital flat-panel monitors whether HDMI or DVI interface, the M.D.V technology can increase the system performance. Adding displays to a system has never been more practical with the BIOSTAR M.D.V technology. Experience for yourself the advantages of using multiple digital displays.

Integrated HDMI with HDCP

Onboard HDMI connector allows full video & audio support. It has industry-leading high definition video quality.

PCI Express 2.0 Support

PCI Express 2.0 bus architecture offers a futureproofing bridge to tomorrow's most bandwidthdriven games and 3D applications by maximizing 5 GT/s of bandwidth. PCI Express 2.0 motherboards are fully backwards compatible with existing PCI Express products for broad support of PC peripherals.

NVIDIA Hybrid SLI™

Hybrid SLI delivers new multi-GPU technology to a large segment of the PC market, enabling NVIDIA motherboard GPUs (mGPUs) to work cooperatively with discrete NVIDIA GPUs (dGPUs) when paired in the same PC platform. It provides two new technologies— GeForce Boost and HybridPower[™]—that allow the PC to deliver graphics performance. These are ideal for today's applications and games when 3D graphics horsepower is required, or there is no transition to a lower-powered operating state.

Hybrid Space-Pipe

COOLER HARBOR

O.N.E

Biostar offers 3 kinds of overclocking settings (V6/V8/V12) that provide good, better, best O.C settings. The motherboard features the Biostar T series motherboards that allow users to conveniently load preset BIOS settings. These BIOS settings give users freedom to enjoy overclocking with simple instructions.

Tseries OC Utility

T-series OC utility presents the most convenient Windows-based system performance enhancement and utility management. Its 4 separate utilities include overclocking, BIOS update, and H/W monitoring and PC health for monitoring system status.

Hybrid Space-Pipe {INS_STR}

A desktop system increases more fans to achieve better overclocking. Normally, a motherboard's heat generators include chipsets, PWM and graphics card.Combining Biostar's "Cooler Harbor" and "V-Pipe" thermal solution delivers silent and ultimate thermal performance. Overclockers can boost desktop performance effortlessly with this dynamic innovation!

Cooler Harbor {INS_STR}

The effective thermal design directs the heat generated by the MB chipsets to the heat sink on the real I/O panel, which is easily expelled by the existing airflow from the CPU fan. The ideal heat-pipe design on this motherboard is an original fanless design that does not have reliability problems found in a chipset fan. Product Warranty : 12 months

Space-Pipe

SPACE-pipe is a new silent north bridge cooling device. It uses a heat-pipe to conduct heat from the chipset heat sink to a PWM fin-heat sink collection module. Airflow from the CPU fan removes the heat collected from the CPU, the chipset, and PWM fin-heat sink, which cools your system effectively with no additional noise.

X.D.C (eXtreme Durable Capacitors)

Biostar adopts low ESR and high ripple conductive solid state caps that provide sufficient, stable power supply to the CPU. The life span can also be more than 6.25 x of ordinary liquid caps.

MEDIA SOLUTION

MX SUITE

As an Biostar customer you can download MAGIX multimedia tools designed to enhance your music, videos and photos for free. From music and website creation to video editing and photo management. Four products that cover all of your multimedia needs. Simply do more with your media than you ever thought possible.

Simplitec

"Simplitec" offers premium solutions to ensure your PC is faster, more reliable and free of security gaps - automatically or with customized setups. "Simplitec" is a free bundle software to scan your computer for problems and offers a professional solution for each problem to put your PC back in top form.

BIO-Flasher

BIO-Flasher is a convenient BIOS update tool. Just launch this tool and put the BIOS on USB pen driver before entering the OS. You can update your BIOS with only a few clicks without preparing an additional floppy disk or other complicated flash utility.
