

JMicron SATA Controller Technical Updates

This is an information update for the user guide that comes with your motherboard package.

J-Micron SATA Controller [Enabled]

[Enabled] Enables the J-Micron SATA controller.

[Disabled] Disables the J-Micron SATA controller.

-
- The BIOS item mentioned above is located in the section of **Onboard Device Configuration** under the **Advanced** menu. Please refer to the chapter of **BIOS setup** of your motherboard user manual for details.
 - To enable hot-plugging and AHCI support, set the BIOS item mentioned above to [Enabled], and then install the J-Micron driver that came with your motherboard support DVD. Ensure to **both** enable the BIOS item and install the controller driver to enjoy full AHCI function.
