Specification:

The advanced features of the NEC Power TX mainboard include:

- Processor (CPU) - Intel Pentium Processor with MMX technology, Socket 7 ZIF Socket for CPU:
- Operating at 50/60/66/75/83/100-500 MHz
- Also supports Intel 55C, IBM, Cyrix/6x86/6x86L/6x86MX and AMD K5/K6/K6-2/K6- 3/1DT C6/C6-2/Rise CPU Processors.
- Chipset - NEC Power TX PCI Set.
- RAM Modules - 72PIN SIMM * 2 for both Fast Page and EDO DRAM. 168PIN DIMM * 1 for 3.3V Synchronous DRAM.
- Expansion Slot - 32 bit PCI Master Bus * 4, 16 bit ISA Bus * 2
- On Board I/O - 2S/1P/1G (UART 16550) (EPP, ECP)
- On Board PCI IDE - PCI Bus IDE port * 2 (PIO mode 3/4). Switching power from 2.1V to 3.5V for CPU core voltage.
- I/O Connector - Support PS/2 Mouse and Standard AT Style Keyboard
- BIOS - Supports Plug & Play BIOS and Flash EPROM.
