JP1 - Pin 44 - Turbo LED
JP2 - Pin 85 - (Unpopulated)
JP3 - Pin 18 - Reset Switch
JP4 - Keyboard Lock (jumper to use)

SW1 setting same as https://www.ultimateretro.net/en/motherboards/5589

Keyboard Erorrs at startup with all BIOS's, but works with IBM XT keyboard
after bypassing error. Will not work with Heathkit XT keyboard (Caps
Locks/Num Locks light stay on)

Won't boot 5160 floppy contorl with stock Award BIOS, works with Phoenix
BIOS 2.51 or 2.52C (https://www.ultimateretro.net/en/bios/?chipsetId=123)
with SW1/1 set to 4.77Mhz (off).

None of the three BIOS's will boot an XTIDE
