Clearing the CMOS settings

CAUTION: Do not change any jumper setting while the system is running. Damage to the motherboard may result.

Clear RTC RAM (3-pin J3) This jumper allows you to clear the Real Time Clock (RTC) RAM in CMOS. You can clear the CMOS memory of date, time, and system setup parameters by erasing the CMOS RTC RAM data. The onboard button cell battery powers the RAM data in CMOS, which include system setup information such as system passwords.

1. Turn off the PC and unplug the power cord.
2. Move the jumper cap from pins 1-2 (Normal) to pins 2-3 (Clear CMOS).
3. Keep the cap on pins 2-3 for about 5~10 seconds, then move the cap back to pins 1-2.
4. Plug the power cord and turn on the PC.
5. When you start the PC, enter BIOS setup to change BIOS settings.
