**Product Related Information**

Pentium® II Processor Based Motherboard

QDI-P6I440LX/SL Legend II

Chipset	• Intel 440LX chipset
Bus Type	• 3 PCI Local bus slots • 3 ISA bus slots • 1 RAIDport™ slot • 1 AGP (Accelerated Graphic Port) slot
CPU	• Intel Pentium® II Processor 233/266/300/333 MHz
System Memory	• Four 168pin DIMM sockets

	- Support up to 512MB SDRAM - Support up to 1GB EDO DRAM
BIOS	- Award Flash BIOS with Plug and Play ready - DMI compliance and built-in NCR 53C810 BIOS support
On board IDE	- Two Bus Master IDE ports - Support up to PIO mode 4 and DMA mode 2 - Support Ultra DMA/ ATA
I/O Feature	- Two high speed serial ports (16550 Fast UART compatible) - One enhanced parallel port (SPP/EPP/ECP support) - One floppy port supports up to 2 floppy drives (360K/720K/1.2M/1.44M/2.88M) - On-board two USB connectors - Support IrDA infrared - On-board PS/2 mouse and PS/2 keyboard connectors
Onboard SCSI	- Adaptec AIC-7880 SCSI controller - One 68-pin Ultra-wide SCSI controller - One 50-pin Ultra SCSI connector
Onboard LAN	- Intel 82557 MAC + NS83840A 10/100Mbps LAN controller
Green Function	- Support ACPI (Advanced Configuration Power Interface) compliance - Three Green mode support: Doze, Standby and Suspend
Advanced Feature	- SpeedEasy for jumperless CPU upgrade or jumper emulation mode - Intelligent Monitoring System (LM78 & LM75) for system voltages, temperature, chassis intrusion and FAN speed (optional) - Support LS-120 Floppy drive - Multi-boot support for Floppy, IDE, SCSI, LS-120, CD-ROM..etc - On board switching voltage regulator (support 1.8V to 3.5V) - Support ECC (Error Checking and Correction) - Support LDCM (LANDesk Client Manager) software (optional) - Support Windows 95 software power shutdown - Support system wake-up by Modem Ring-On and Alarm-On
Board Size	- 305mm X 244mm
